OPERATIONAL ANALYSIS OVER THE PAST TWO YEARS

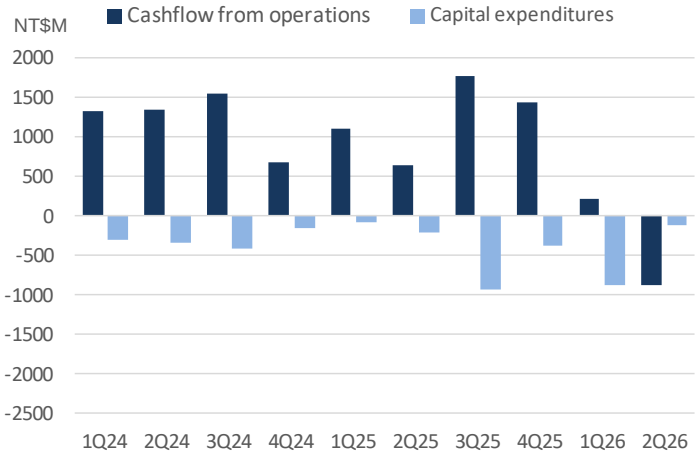

Well-Controlled Opex and Positive Operating Cash Flow

Operating expense trend

- With disciplined expense control, 1H26 opex reduced to below NT$800 mn.

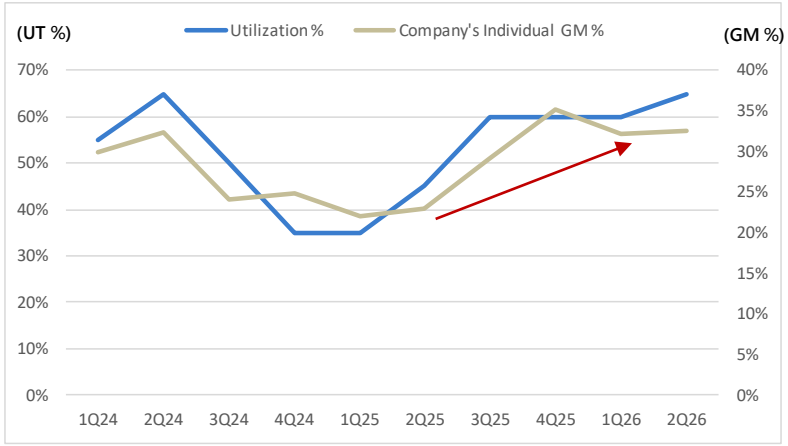

Operating cash flow vs. Capex

- Cash flow from operating activities remained an inflow for 10 consecutive quarters, but shifted to an outflow in 2Q26 due to inventory build-up of raw materials.
- Project-based capex resumed in 2H25, primarily for Optical and GaN projects.

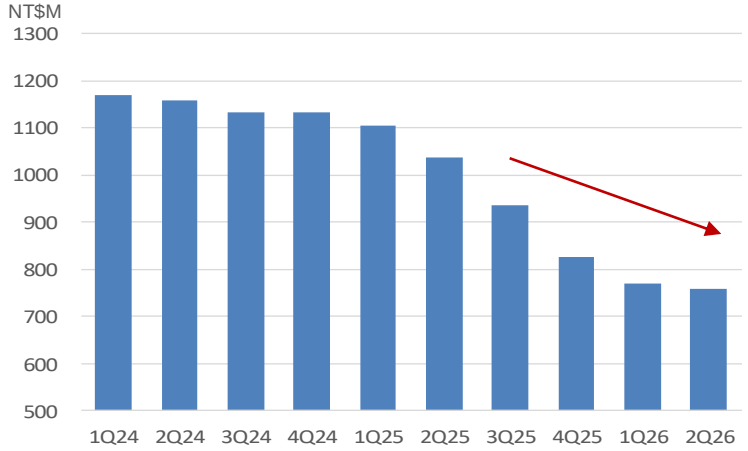

Utilization Recovering and Depreciation Pressure Easing

Company's individual GM vs. UT ratio

- As capacity utilization improves, the benefits of product mix optimization are expected to become more evident.

Depreciation trend

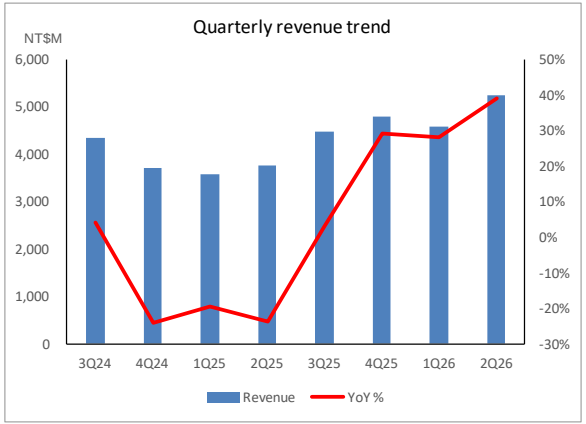

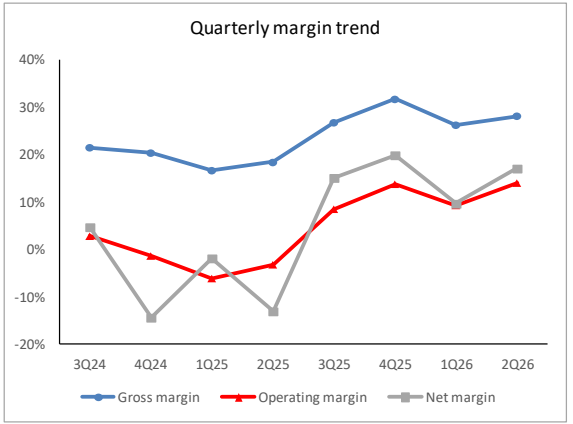

- The depreciation peak has passed, and quarterly depreciation expense has remained below NT$100 mn since 2H25.
- As new capex is gradually capitalized as fixed assets, depreciation expense is not expected to decline significantly further.

QUARTERLY RESULTS & GUIDANCE

Revenue & Margin Trend

- 2Q26 consolidated revenue was NT$5,257 mn, up 15% QoQ and 39% YoY, in line with expectations.
- Reflecting the net impact of a more favorable product mix and higher shipment volumes, partially offset by margin dilution during the initial ramp-up of new products, individual GM was 32.6% in 2Q26, up 0.5 pp sequentially. Consolidated GM was 28.2%, also improving by 1.9 pp sequentially. With opex remaining well controlled, OPM reached 14.1%, up 4.8 pp compared to the previous quarter.

Product Mix

* Others: Revenue not attributable to main product segments and additional revenue being consolidated in accordance with IFRS.
Source: company.

Guidance

- We expect 3Q26 consolidated revenue to increase low-teens QoQ.

- We expect 3Q26 consolidated gross margin to be around the level of low-thirties.
