Advanced Packaging Enables the Scaling of AI

More than Moore	Lowering Overall Cost	Efficiency & Integration
Demand for AI performance is faster than Moore's Law	Novel design & process at packaging to lower overall development cost	More functional blocks and power efficiency

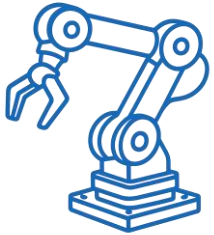

High Density Heterogeneous Integration using Advanced Packaging is a key enabler

ASE Key Pillars of Market Dominance

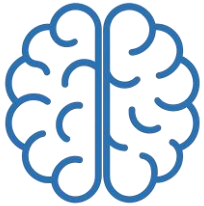

Scale

Global largest OSATs with highest operational efficiency

Automation

Automated production offering for all process lines

Technology

Technology leadership with comprehensive offering

Presence

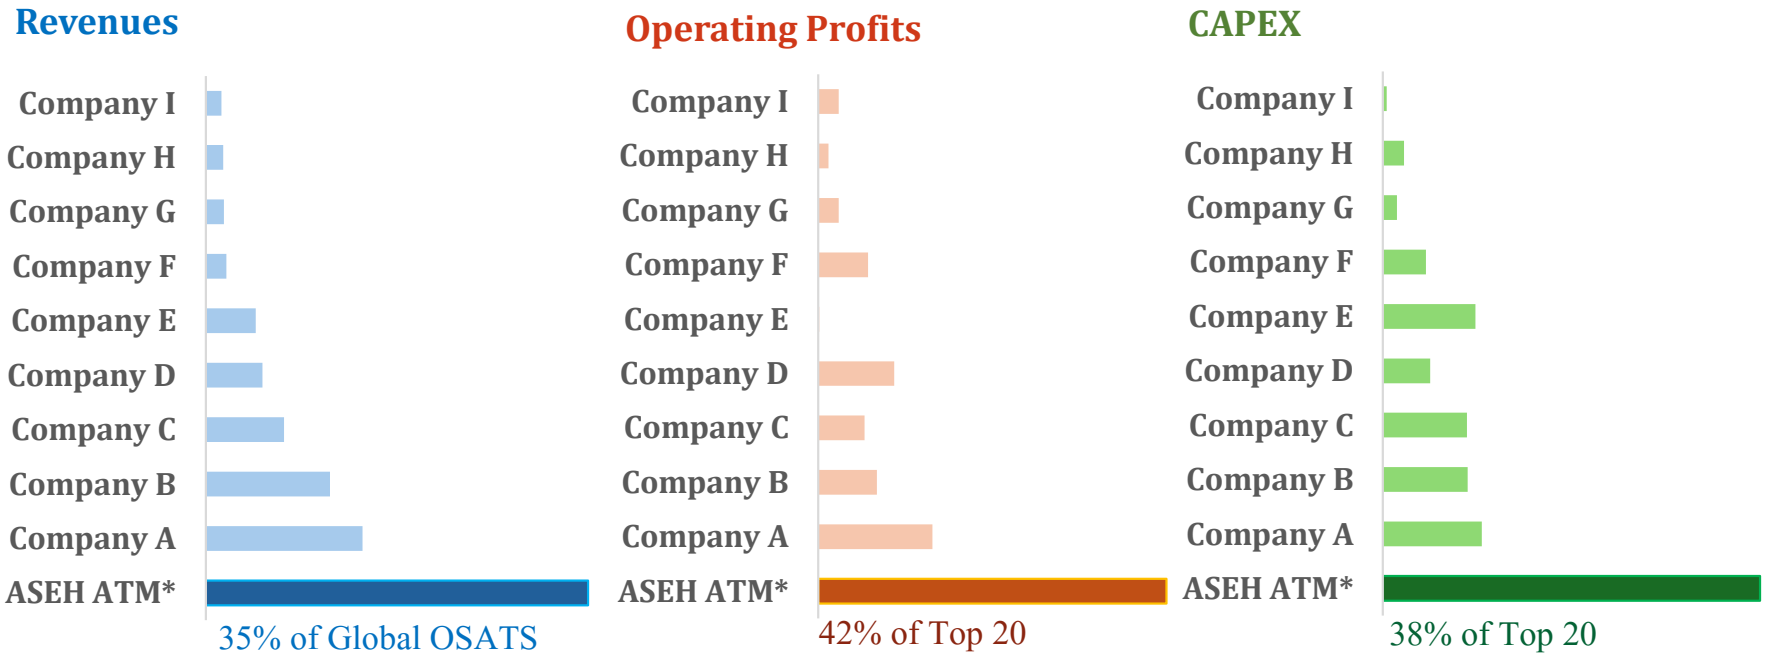

Global footprint and a wide customer/ product portfolio

Resources

Strong financial capabilities and a deep talent pool

Scale Matters

2024

- ✓ 56 lights out factory
- ✓ AI platform for manufacturing process optimization
- ✓ Automation across all product lines

Efficiency

- Higher labor productivity
- Higher space efficiency
- Shorter cycle time

Consistency

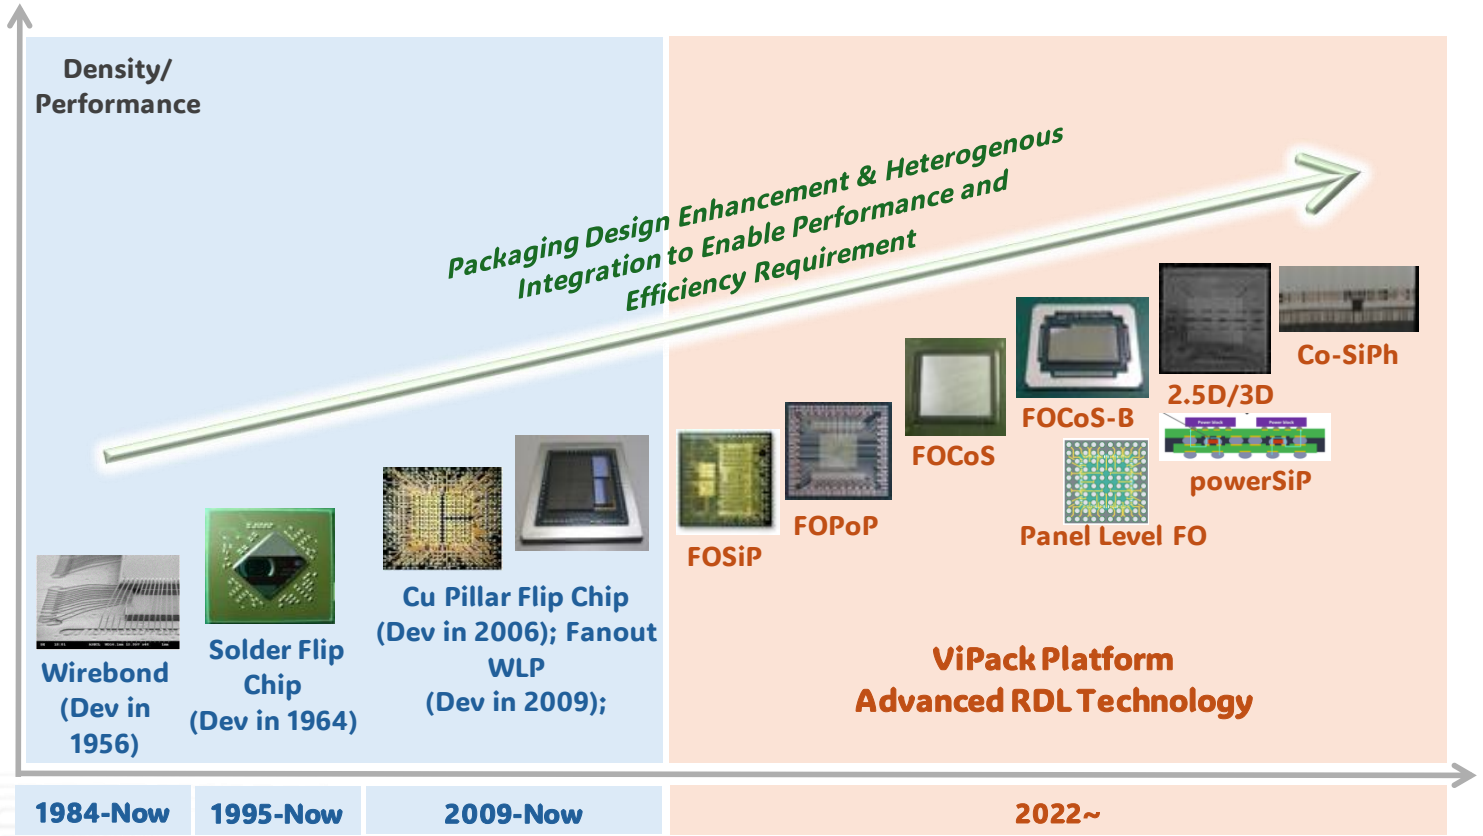

- Improving yield rate
- Manufacturing process optimization and yield enhancement through AI & Big data analysis

Traceability

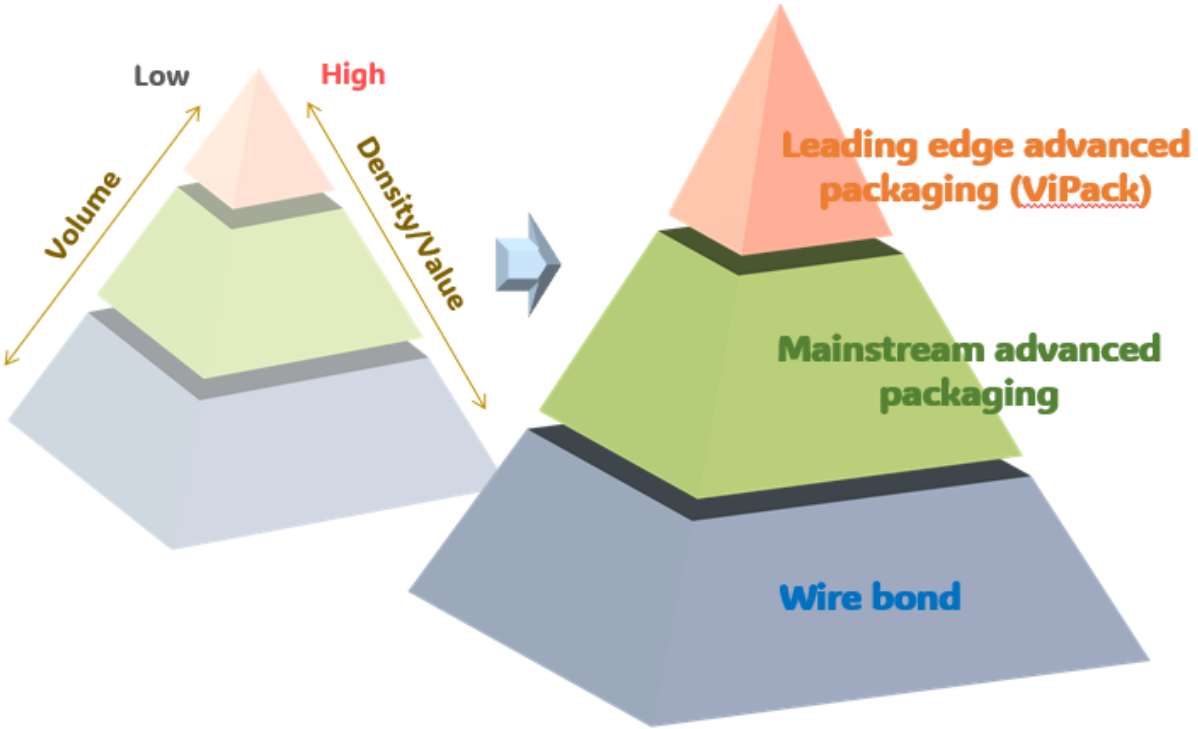

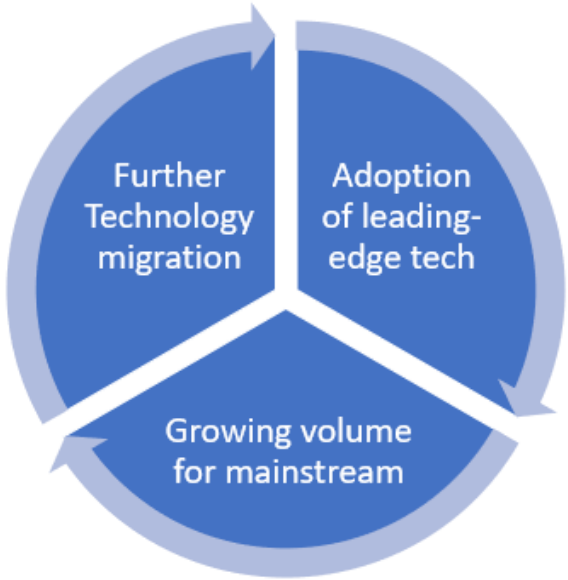

- Better traceability for inventory management, processing history, and real-time quality status

Comprehensive Offering with Leading-Edge Tech

Opportunities across the spectrum

Accelerating Growth in Testing Services

Scale

- Global largest outsourced testing provider
- Complete offering of wafer probing, final test, burn-in and SLT

Turnkey

- Shorter cycle time
- Easier supply chain management
- Increasing need for testing in better packaging flow of AI/HPC devices

Automation

- Efficiency
- Traceability
- Consistency
